

# Connecta-Floor

total floor hire solution

*Add the finishing touch to your event with our unique, versatile, portable and multi-functional flooring.*

## About Connecta-floor

Connecta-floor started in 2009 with the vision of a locally produced quality product that is both larger, harder wearing and far superior looking than what is available on the market. We started manufacturing our own locally designed and engineered rental floor panels in Durban and by early 2010 had bought out the panels in **3 finishes** namely

• Savannah

• Pearl teak, Wheat

• Astro turf.

## Specifications:

	Laminate	Astro-turf
Surface	8.3mm high density laminate board with aluminium oxide surface finish for high abrasion resistance	Short pile synthetic fibers made to look like natural grass
Colours	Pearl teak, Wheat, Savannah	Green
Core	12mm medium density fibreboard, rated E1	
Locking system	Modular locking system, keeps all panels tightly locked and 'Connecta-ramps' firmly in place. No ridges / protrusions to trip over	
Dimensions	Ready made panels which come in different sizes to fit your octanorm stand <ul style="list-style-type: none"> <li>• 750 × 750 × 22mm</li> <li>• 500 × 750 × 22mm</li> <li>• 250 × 500 × 22mm</li> </ul>	
Weight	14.5kg per panel	
Packaging	Connecta-boxes of 50 units	
Finishing ramps	Silver milled finished or on request bronze available	

Keeping up with moving trends and requests for customization we now offer; mixed black and white panels, wide variety vinyl colours, custom vinyl prints, monograms and painted panels, the possibilities are endless.

## Connecta-floor's unique features

The modular loose panels are easy to transport. Can be assembled in minutes and installed over sand, gravel, stone, grass, paving or concrete. It is an incredibly easy, time and labour saving way to set up virtually anywhere.

### Quick and easy to install and transport

There is no need for special tools or screws with our flooring panels. They simply slot together for easy set-up or removal and are locked together using an allen key.

When the panels are pushed together, they form a solid structure that won't come apart while the floor is in use. The panels are locked in position. The outside edges of the floor are made safer and stronger with a finishing ramp. Ensuring that the whole structure is convenient, attractive and durable.

### Flame resistant

Connecta-floor meet commercial flammability codes and a number of other safety codes with it's high flame resistance and low smoke emission.  
Fire classification: EN13501-1/ EN14041:2004 Flame Retardant – B1

### Stain resistant

Connecta-Floor is stain resistant to the toughest most common "eventing" stains such as tea, coffee, mud, wine and lipstick.  
EN13329 Class 5 (no effect)

### Connecta-cable

Easy, user-friendly lay-in (or drop in) cable reticulation power channels available on request. The cables run in tamper resistant channels and the flooring panel is protected by an aluminum framework.

### Connecta-ramp

Strong and durable 13° 'Connecta-ramps' are easy to attach, improve the safety rating of the floor are wheel chair friendly, provides safe access and are available in silver milled finished or on request bronze.

### Frame work

An integrated locking system that keeps the floor from pulling apart and allows for a neat finish as each Connecta-floor panel is protected by an aluminum frame.

### Proudly South African

Eco friendly as it is manufactured locally in South Africa on locations at our Durban warehouse and stored in our various warehouses across South Africa.
